## Elevator Pitch

CoilxN is an innovative startup that leverages smart collection points, IoT technology, and blockchain to prevent used cooking oil from polluting rivers and oceans. By transforming waste oil into biofuels, biodegradable soaps, and eco-friendly fertilizers

## Climate Problem

CoilxN prevents water pollution by collecting and repurposing used cooking oil into biofuels, soaps, and fertilizers, promoting a circular economy and protecting ecosystems.

## Solution

CoilxN collects and repurposes used cooking oil into biofuels, soaps, and fertilizers, preventing water pollution and promoting a circular economy with smart technology.

## Revenue Model

We generate revenue by selling biofuels, fertilizers, and soaps, offering premium oil collection services, and monetizing carbon credits, creating a sustainable and scalable business model.

## Target Market

Our target market includes households, restaurants, and food industries generating used oil, plus biofuel producers, organic farms, and eco-friendly manufacturers seeking sustainable solutions.

# Social Impact

Migrants People Living in Extreme Poverty Women LGBTQI+ People

# Demand Evidence

Growing environmental regulations, increasing sustainability awareness, and the rising demand for biofuels and eco-friendly products confirm the need for responsible oil disposal and recycling solutions like CoilxN.

# Competitors

Our competitors include traditional oil collectors and recycling companies. However, few offer a tech-driven, transparent, and circular economy approach like CoilxN. In our area, informal disposal remains common, highlighting the need for our solution.

# Founder Expertise

Our team brings expertise in environmental law, technology, logistics, and circular economy. With experience in sustainability and water protection projects, we develop an effective, scalable solution with real impact.

# External Support

We have received support through mentorship, and networking, helping us refine our model and expand our impact.

# Team

Our team handles strategy, operations, and technology. One focuses on legal and environmental compliance, another on logistics and partnerships, and the third on innovation and tech integration.
