EcoEthanol Innovations (Amarúz)

Country: Colombia · Bogota **Category:** Air & Environment **Impact Areas:** Circular Economy **Stage:** Launched
Website: https://www.vinosamaruz.com/ **Founder:** Anderson Stiven Florez Olarte

Elevator Pitch

EcoEthanol Innovations transforms non-marketable fruits and vegetables into high-quality ethanol for fuels and alcoholic products, reducing food waste and contributing to environmental sustainability.

Climate Problem

Globally, millions of tons of fruits and vegetables are wasted annually. EcoEthanol Innovations recycles these foods, which are no longer fit for human consumption, to produce ethanol, a valuable component in the manufacturing of fuels and alcoholic products. Our main customers will include biofuel companies, distilleries, and manufacturers of products that require ethanol as a solvent or preservative, providing a sustainable and profitable solution to food waste.
