

# Geo-Themis · Water

---

## Geo-Themis

---

**Country:** ?? Colombia · Cali, valle del cauca **Category:** Water **CT Taxonomy:** CT-IC-004 — Climate Data Platforms **Impact Areas:** Nature-Based **Stage:** Ideation **Team Size:** 1.0 **Funded:** False

---

## Elevator Pitch

---

Geo-Themis develops geospatial technology solutions to monitor, prevent, and mitigate environmental and climate risks. We use geospatial data and artificial intelligence to strengthen regional resilience and support sustainable decision-making.

## Climate Problem

---

Environmental pollution goes unpunished due to a lack of evidence and access to justice. Vulnerable communities are unable to prove the damage, allowing ecosystems to degrade and affecting public health, water resources, and the future of the climate.

## Solution

---

Geo-Themis allows users to report damage via WhatsApp; AI converts reports into legal actions, while sensors and satellites generate real-time evidence, which is stored on the blockchain to prevent tampering.

## Revenue Model

---

Revenue from contracts with governments, NGOs, and companies: environmental monitoring licenses, data analytics, sensor installation, and legal and technological services for risk management and environmental compliance.

## Target Market

---

Governments, NGOs, and communities in vulnerable regions of Latin America that are facing pollution and lack access to effective environmental justice.

# Social Impact

---

Indigenous Peoples, Persons Belonging to National or Ethnic - Religious and Linguistic Minorities, People Living in Extreme Poverty, Women

# Demand Evidence

---

The growing climate crisis, regulatory pressure, and increasing environmental conflicts underscore the need for solutions that generate evidence and prompt legal action in vulnerable areas.

# Competitors

---

There are environmental monitoring platforms and satellite data services, but none of them integrate legal AI, automated evidence gathering, and legal action. At the local level, there are no equivalent solutions.

# Founder Expertise

---

Experience in innovation, strategic thinking, and the use of AI to develop solutions. Ability to learn quickly, integrate technology, and focus on solving real-world problems with environmental and social impact.

# External Support

---

Finalist in the San Buenaventura University LegalTech competition, with academic validation and initial mentoring. Development supported by research in law, technology, and social innovation.

# Team

---

Solution design, business model development, research, problem validation, and the use of AI to build and refine the prototype.

# Founder

---

Eider nicolas Salcedo Landazuri

---
