Country: México · Ixtapaluca, State of Mexico **Category:** Transportation **Stage:** Ideation

Elevator Pitch

Reemplazo de taxis que generan emisiones de carbono en la zona metropolitana del valle de México, por coches eléctricos de preferencia que se manejen solos para la seguridad del usuario.

Climate Problem

Reduction of greenhouse gas emissions in the metropolitan area of ??the Valley of Mexico caused by the daily movement of a dense population, as well as that of electric cars, the insecurity of users is fought and accidents due to human errors are avoided. Therefore, a solution is given to improve air quality in the city and provide security, the customers would be the users who will pay for the transport service.
