

# Huxtal hidrocultivo · Food & Agriculture

---

## Huxtal hidrocultivo

---

**Country:** México · Estado de México **Category:** Food & Agriculture **Impact Areas:** Nature-Based, Mitigation  
**Stage:** Ideation

---

## Elevator Pitch

---

The idea is to create a system where you can cultivate vegetables using water, and at the same time you can raise fishes for consumption. The fishes help also as fertilizer for the vegetables.

## Climate Problem

---

Society in Mexico has grown rapidly, so growing spaces are running out and the demand for food continues to grow. Our clients would be those customers who like to have plants, grow their own vegetables to eat healthier and have enough space to have them.

## Founder

---

Ximena Zuñiga Carranza
