Elevator Pitch

We have development a natural, mineral-based fertilizer made from Leonardite stone. When it is pulverized, awake its high levels of silicon, humic and fulvic acids, and macro and micro nutrients. Work as an organic soil revitalizer and it keeps the health

Climate Problem

We have obtained a natural, mineral-based fertilizer directly, which produces non environmental pollution and, on the contrary, improves soils Quality, thus strengthening plant roots and increase productivity. This has improved production cycles by 30%

Solution

We are offering a natural product that can dissapear the use of the chemical fertilizers and pesticides in the Agriculture. A product cheap in comparison with the others organic productos, and with a potencial use for any kind of soils and product.

Revenue Model

We have two segment to create revenues, one is with the directly sells at the little or medium farmer, and the other is selling our producto at the goverment. Nowadays the state give to the little farmers guano from the island but only reaches of the 10%

Target Market

All the little and medium farmers in all the world.

Social Impact

Indigenous Peoples, People Living in Extreme Poverty, Women

Demand Evidence

Because the problem with the chemical fertilizer is real, their Price is each time less affordable and any group that want to Certificate their land need to show what they are using, and with our product they can dissapear all the problems of their lands

Competitors

Tha organic fertilizer are very expensive, and more If need to apply more than once, and our product fulfills with the function of fertilizer, nutrients and more for the lands. Is like a 3 in 1 for a little Price.

Founder Expertise

We start in this business like Freight Forwarder, exporting all kind of perishables products, in 2022 we start with our own fields and since the beggining we knows that don't want to use any chemical in our lands and in that search we found the Leonardite

External Support

We have participated iN a competition with the state and won USD40,000 to demonstrate its effectiveness. And after testing with cow manure, chicken manure and seaweed, we were able to see that it's functionality is enhances with cow manure, and heals soil
