Elevator Pitch

Clean up of solid residues in water bodies.

Climate Problem

The pollution on water bodies such as lakes, oceans, etc.

Solution

Picking up the solid residue on the surface of water bodies. We're evaluating the use of AI to help with the computer vision recognition of these solids.

Revenue Model

We're going to rent the device.

Target Market

Mining companies

Social Impact

Indigenous Peoples, People Living in Extreme Poverty

Demand Evidence

Because of the high number of news reporting the pollution these mining companies do.

Competitors

Not yet.

Founder Expertise

I'm a mechatronics engineering student with curiosity and eager to put into teal projects the knowledge I have been collecting throughout my years in university.

External Support

This is at the stage of ideation so none so far.
