the game of helping to compact plastic bottles · Air & Environment

the game of helping to compact plastic bottles

Country: Colombia · cali **Category:** Air & Environment **Impact Areas:** Adaptation **Stage:** Prototype **Founder:** diego restrepo

Elevator Pitch

This idea consists of adapting a manual plastic bottle compactor next to the garbage cans with the added value that can entertain users through an indicator of the pressure force exerted by the user. These compacted bottles can reduce recyclable plastic storage deposits by up to 80%. Additionally, the material of the manual compactor is 100% plastic wood, to demonstrate the resistance of the plastic.
